

15th Nordic Conference on Reindeer and Reindeer Husbandry Research

Reindeer husbandry and the surrounding world, January 26-29, 2009

Poster presentation instructions

Posters will be displayed during the whole conference and presented in “speed-talks” during oral sessions (see below). There will be several short sessions for viewing the posters.

Posters

Posters should be written in English.

Maximum size of a poster is 75 cm broad and 100 cm high. The poster should be easily readable from a distance of about 2 meters (see also guidelines and links below).

Upon arrival at the conference, poster presenters will receive directions to boards marked with their individual poster ID number. Drawing pins will be provided and are the only accepted type of fastener on the boards.

The time of the poster sessions will be shown in the program. Be sure to be available for questions at your poster during “your” poster session.

Speed-talks

Posters will be orally presented in two-minute “speed-talks” in the conference lecture hall. Please prepare one power-point slide (alt. a jpg or gif file with size suitable for transformation into a power point slide) for the “speed-talk” presentation. Send the slide to the organisers in an e-mail to poster_NOR2009@arbetsplats.slu.se on January 16, 2009, at the latest. The name of the file should start with the first author's or presenter's surname and initials, as e.g. “WhiteAA.ppt”. Please use the name of the file (surname and initials) as e-mail subject.

On arrival at the conference, make sure to check the time for your “speed-talk”. Contact the chairperson of your “speed-talk” session (shown in the program) prior to the session.

Helpful hints about poster design:

The key objective of a poster is to provide a brief and clear overview of your work so that people, who are really interested, can ask you for more information. Loading your poster with too much information and non-relevant adornment might be counter-productive. Use clear, large fonts, simple graphics and pictures when available and necessary.
